IT Employment Grows in the Second Quarter; Pauses in June

Alexandria, VA, July 21, 2011 – While the number of IT jobs increased in the second quarter of this year, IT employment growth paused in the month of June. According to a monthly index of IT jobs developed and published by TechServe Alliance, a collaboration of IT services firms, clients, consultants and suppliers, the number of IT jobs was essentially unchanged at 4,051,200 (down 300 from the previous month). IT employment is up by nearly 133,000 jobs since June 2010.

"While growth in IT employment paused in June, all signs point to the sector continuing to outperform the overall job market," stated Mark Roberts, CEO of TechServe Alliance. "While there is always going to be some month-to-month variance given the dynamic nature of the economy and labor market, our outlook remains positive for the remainder of the year," added Roberts.

IT jobs are found in virtually every sector and industry in varying degrees. The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT professionals as well as to the number of all jobs.

Comparisons of TechServe Alliance's IT Employment Index to employment in some key sectors with significant numbers of IT jobs as well as to all private-sector jobs					
June 2011	TechServe Alliance IT Employment Index	Computer systems and design services	Data processing, hosting and related services	Telecommunications	Total non-farm jobs
number of jobs	4,051,200	1,506,900	240,300	869,900	131,017,000
change from previous month	- 0.01%	+ 0.38%	- 0.12%	- 0.05%	+ 0.01%
change from same month, one year earlier	+ 3.39%	+ 4.92%	- 0.58%	- 3.16%	+ 0.80%

###

Technical note: TechServe Alliance's IT Employment Index is the first specific measurement of IT employment. This unique measurement of total IT employment is created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 22 industries and industry sectors employing significant numbers of IT workers including the manufacturing, wholesale and retail trade, financial, information services, business and professional services, and education and health industries. The monthly IT Employment Index is based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and therefore, the Index is revised accordingly. The IT Employment Index is also subject to annual revisions and was benchmarked in February 2011 with the publication of the BLS January 2011 employment report, which included revisions to several years of employment data. The next revision will be published in February 2012.

ABOUT TechServe Alliance

TechServe Alliance is a collaboration of IT services firms, clients, consultants and suppliers dedicated to advancing excellence and ethics within the IT services industry. Hundreds of IT staffing, IT solutions and IT consulting firms and tens of thousands of affiliated professionals, count on TechServe Alliance to keep their leadership informed, engaged and connected. TechServe Alliance serves as the voice of the industry before the policymakers and the national and trade press. By providing access to the knowledge and best practices of an entire industry and tapping the "collective scale" of hundreds of companies, TechServe Alliance supports its members in the efficient delivery of best-in-class IT services for clients and exceptional professional opportunities for every IT consultant.
