IT Employment's Modest Rise in November Continues Growth Trajectory

Alexandria, VA, December 13, 2010 – While short of the 12,000 IT jobs added in October, IT employment continued its pattern of month-over-month growth by adding 600 jobs in November.

According to a monthly index of IT jobs developed and published by TechServe Alliance, a collaboration of IT services firms, clients, consultants and suppliers, in November, IT employment stood at 3,906,200 jobs; reflecting modest incremental growth of 0.02 percent. While November's numbers were weaker than preceding months, it still reflected the continuation of the trend of month-over-month growth which has been unbroken for 12 consecutive months. On a year-over-year basis, IT employment was up 2.5 percent, compared to 0.6 percent increase in total non-farm employment.

"While November's IT employment gains were more modest than prior months, we should put it in perspective. IT employment has now grown every month for the last 12 months. While we will continue to see month-to-month variances given the dynamic nature of the economy and labor markets, our bullish forecasts for the coming year remain unchanged." commented Mark Roberts, CEO of TechServe Alliance.

IT jobs are found in virtually every sector and industry in varying degrees. The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT professionals as well as to the number of all jobs.

Comparisons of TechServe Alliance's IT Employment Index to employment in some key sectors with significant numbers of IT jobs as well as to all private-sector jobs					
November 2010	TechServe Alliance IT Employment Index	Computer systems and design services	Data processing, hosting and related services	Telecommunications	Total non-farm jobs
number of jobs	3,906,200	1,473,300	245,100	920,600	130,539,000
change from previous month	+ 0.02%	+ 0.06%	unchanged	+ 0.12%	+ 0.03%
change from same month, one year earlier	+ 2.46%	+ 2.93%	- 1.29%	- 4.24%	+ 0.65%

###

Technical note: TechServe Alliance's IT Employment Index is the first specific measurement of IT employment. This unique measurement of total IT employment is created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 16 industries and industry sectors employing significant numbers of IT workers including the manufacturing, wholesale and retail trade, financial, information services, business and professional services, and education and health industries. The monthly IT Employment Index is based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and therefore, the Index is revised accordingly. The IT Employment Index is also subject to annual revisions and was benchmarked in February 2010 with the publication of the BLS January 2010 employment report, which included revisions to several years of employment data. The next revision will be published in February 2011.

ABOUT TechServe Alliance

TechServe Alliance is a collaboration of IT services firms, clients, consultants and suppliers dedicated to advancing excellence and ethics within the IT services industry. Hundreds of IT staffing, IT solutions and IT consulting firms and tens of thousands of affiliated professionals, count on TechServe Alliance to keep their leadership informed, engaged and connected. TechServe Alliance serves as the voice of the industry before the policymakers and the national and trade press. By providing access to the knowledge and best practices of an entire industry and tapping the "collective scale" of hundreds of companies, TechServe Alliance supports its members in the efficient delivery of best-in-class IT services for clients and exceptional professional opportunities for every IT consultant.
