IT Employment Continues to Outperform Overall Labor Market

Alexandria, VA, December 7, 2011- In November, IT employment continued its pattern of month-over-month growth and outperforming the general labor market.

According to a monthly index of IT jobs developed and published by TechServe Alliance, a collaboration of IT services firms, clients, consultants and suppliers, the number of IT jobs increased by more than 7,100 rising to 4,068,400 jobs in November, up by more than 84,000 jobs from November 2010 or 2.1%.

In comparison, overall job growth for the economy was less than 0.1 percent in November and up only 1.2 percent year-over-year.

"Despite a mixed report on the overall jobs market, demand for IT professionals remains strong," stated Mark Roberts, CEO of TechServe Alliance. "I remain very bullish on the

prospects for continued growth in 2012 and anticipate IT employment will surpass its all-time high set back in June 2008," added Roberts.

IT jobs are found in virtually every sector and industry in varying degrees. The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT professionals as well as to the number of all jobs.

Comparisons of TechServe Alliance's IT Employment Index to employment in some key sectors with significant numbers of IT jobs as well as to all non-farm jobs					
November 2011	TechServe Alliance IT Employment Index	Computer systems and design services	Management and technical consulting services	Data processing, hosting and related services	Total non-farm jobs
number of jobs	4,068,400	1,524,600	1,066,900	237,600	131,708,000
change from previous month	+ 0.2%	+ 0.3%	+ 0.4%	- 0.4%	+ 0.1%
change from same month, one year earlier	+ 2.1%	+ 4.5%	+ 6.7%	- 1.2%	+ 1.2%

###

Technical note: TechServe Alliance's IT Employment Index is the first specific measurement of IT employment. This unique measurement of total IT employment is created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 22 industries and industry sectors employing significant numbers of IT workers including the manufacturing, wholesale and retail trade, financial, information services, business and professional services, and education and health industries. The monthly IT Employment Index is based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and therefore, the Index is revised accordingly. The IT Employment Index is also subject to annual revisions and was benchmarked in February 2011 with the publication of the BLS January 2011 employment report, which included revisions to several years of employment data. The next revision will be published in February 2012. (August 2011 value of the IT Employment Index incorporates striking workers who were officially not counted during the survey week, but did have a job in August.)

ABOUT TechServe Alliance

TechServe Alliance is a collaboration of IT services firms, clients, consultants and suppliers dedicated to advancing excellence and ethics within the IT services industry. Hundreds of IT staffing, IT solutions and IT consulting firms and tens of thousands of affiliated professionals, count on TechServe Alliance to keep their leadership informed, engaged and connected. TechServe Alliance serves as the voice of the industry before the policymakers and the national and trade press. By providing access to the knowledge and best practices of an entire industry and tapping the "collective scale" of hundreds of companies, TechServe Alliance supports its members in the efficient delivery of best-in-class IT services for clients and exceptional professional opportunities for every IT consultant.
