IT jobs grow in January more than twice the average of the past six months

Alexandria, VA, February 5, 2010 – IT employment grew significantly in January after holding steady for the past six months and following a decline that started at the end of 2008 (approximately a year after the recession began) according to TechServe Alliance, a collaboration of IT services firms, clients, consultants and suppliers. And with better than incremental growth in January—IT employment was up 12,900, or 0.3%, from December 2009—signs are encouraging that businesses demand for IT professionals and services is growing.

IT jobs are found in virtually every sector and industry in varying degrees. The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT professionals as well as to the number of all jobs.

Comparisons of TechServe Alliance's IT Employment Index to employment in some key sectors with significant numbers of IT jobs as well as to all jobs.					
January 2010	TechServe Alliance IT Employment Index	Computer systems and design services	Securities commodity contracts investments	Telecommunications	All jobs
Number of jobs	3,823,700	1,433,500	793,200	954,500	129,527,000
Change from previous month	+ 0.34	+ 0.50%	- 0.40%	- 0.32%	- 0.02%
Change from same month, one year earlier	- 3.92%	+ 0.01%	- 5.66%	- 4.13%	- 3.01%

###

Technical note: TechServe Alliance's IT Employment Index is the first specific measurement of IT employment. This unique measurement of total IT employment is created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 16 industries and industry sectors employing significant numbers of IT workers including the manufacturing, wholesale and retail trade, financial, information services, business and professional services, and education and health industries. The monthly IT Employment Index is based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and therefore, the Index is revised accordingly. The IT Employment Index is also subject to annual revisions and was benchmarked this month (February 2010) with the publication of the BLS January 2010 employment report, which included revisions to several years of employment data.

ABOUT TechServe Alliance

TechServe Alliance is a collaboration of IT services firms, clients, consultants and suppliers dedicated to advancing excellence and ethics within the IT services industry. Hundreds of IT staffing, IT solutions and IT consulting firms and tens of thousands of affiliated professionals, count on TechServe Alliance to keep their leadership informed, engaged and connected. TechServe Alliance serves as the voice of the industry before policymakers and the national and trade press. By providing access to the knowledge and best practices of an entire industry and tapping the "collective scale" of hundreds of companies, TechServe Alliance supports its members in the efficient delivery of best-in-class IT services for clients and exceptional professional opportunities for every IT consultant.
