IT Employment Declines in May; Other Data Hints Employment Picture May be Stabilizing

Alexandria, VA, June 22, 2009 – IT employment continued to decline in May shedding 34,800 jobs or .9%, according to TechServe Alliance, formerly NACCB, which tracks monthly IT employment.

After peaking in November 2008 with over 4 million jobs and dropping the subsequent six months, IT employment stood at 3,849,100 last month. On a year-over-year basis, IT employment declined 3.51% since May 2008.

"Given that improvement in employment typically lags other economic indicators, the continued decline in IT employment was expected," observed Mark Roberts, CEO of TechServe Alliance. "Despite the generally gloomy IT jobs report, survey data and anecdotal reports from our member companies appear to suggest that there is some stabilization in the IT employment picture," commented Roberts.

###

Technical note: TechServe Alliance's IT Employment Index is the first specific measurement of IT employment. This unique measurement of total IT employment is created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 16 industries and industry sectors employing significant numbers of IT workers including the manufacturing, wholesale and retail trade, financial, information services, business and professional services, and education and health industries. The monthly IT Employment Index is based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and therefore, the Index is revised accordingly. The IT Employment Index is also subject to annual revisions and was benchmarked in February 2009 with the publication of the BLS January 2009 employment report, which included revisions to several years of employment data.

About TechServe Alliance

TechServe Alliance is a collaboration of IT services firms, clients, consultants and suppliers dedicated to advancing excellence and ethics within the IT services industry.

TechServe Alliance enhances efficiency and supports IT services companies in their delivery of best-in-class IT services by providing access to an exclusive portfolio of industry information and best practices derived from peer-to-peer knowledge-sharing and subject-matter experts. TechServe Alliance also keeps members regularly informed of critical industry data, business trends, legal and legislative developments, and provides an extensive library of industry-specific model contracts and white papers.

Headquartered just outside the Nation's Capital in Alexandria, Virginia, TechServe Alliance represents the interests of the industry before the U.S. Congress and other policymakers. For more information about TechServe Alliance, please visit www.techservealliance.org.
