THREE FOR THREE: IT EMPLOYMENT TICKS DOWN FOR THE THIRD CONSECUTIVE MONTH

Alexandria, VA, April 12, 2019 – In March, IT employment ticked down 0.04% to 5,344,000 jobs, according to TechServe Alliance, the national trade association of the IT & Engineering Staffing and Solutions industry. This is the third monthly decline in 2019. On a year-over-year basis, IT employment grew by only 0.16% since March 2018 adding a mere 8,600 IT workers.

Engineering employment increased by 0.14 percent sequentially to 2,648,100. On a year-over-year basis, growth in engineering employment increased by 2.47% since March 2018 or 63,900 engineering workers.
“After downward revisions for January, IT employment has declined the first three months of 2019—an inauspicious start to the year,” observed Mark Roberts, CEO of TechServe Alliance. “On a year-over-year basis, IT employment is barely in positive territory. A supply side phenomenon, the ongoing shortage of IT talent has become a huge obstacle for many businesses in the U.S. We see no relief in sight with the promise of an ever more restrictive approach to immigration,” added Roberts.

The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT and engineering professionals.

###

Technical note: TechServe Alliance’s IT Employment Index and Engineering Employment Index are the first specific measurements of IT and engineering employment. These unique measurements of total IT and engineering employment are created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 22 industries and industry sectors employing significant numbers of IT workers and nearly two dozen engineering occupations in 30 select industries and industry sectors employing significant numbers of engineering workers. Both the monthly IT Employment and Engineering Employment Indices are based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and is revised accordingly. Both indices are also subject to periodic revisions and annual rebenchmarking that includes revisions to several years of employment data, which also may incorporate new occupational definitions. Both indices were re-benchmarked going back several years starting with January 2019 data and published in February 2019. In addition, both indices are subject to minor revisions to March and April data. The next major revision will be published in February 2020.

ABOUT TechServe Alliance

TechServe Alliance is the national trade association of the IT & Engineering staffing and solutions industry. Hundreds of IT & Engineering staffing and solutions firms and tens of thousands of affiliated professionals, count on TechServe Alliance to keep their leadership informed, engaged and connected. TechServe Alliance serves as the voice of the industry before the policymakers and the national and trade press. By providing access to the knowledge and best practices of an entire industry and tapping the
"collective scale" of hundreds of companies, TechServe Alliance supports its members in the efficient delivery of best-in-class IT & Engineering staffing and solutions for clients and exceptional professional opportunities for every consultant.
