IT EMPLOYMENT TICKS UP MODESTLY IN MAY;
YEAR-OVER-YEAR GROWTH ANEMIC

Alexandria, VA, June 12, 2019 – In May, IT employment ticked up .05% to 5,347,500 jobs, according to TechServe Alliance, the national trade association of the IT & Engineering Staffing and Solutions industry. After three consecutive monthly declines at the beginning of 2019, we have had two months of very modest growth. On a year-over-year basis, IT employment grew by only 0.11% since May 2018 adding a mere 6,000 IT workers.

Engineering employment increased by 0.12 percent sequentially to 2,653,200. On a year-over-year basis, growth in engineering employment increased by 2.19% since May 2018 or 56,900 engineering workers.

“While it goes without saying that any increase in IT employment is better than a decline, the month-over-month growth we have seen in 2019 to-date is underwhelming” observed Mark Roberts, CEO of TechServe Alliance. “In absolute terms, the US labor market has only
added 6,000 net IT job or .11% on a year-over-year basis---anemic to be sure. Given the ongoing shortage of IT talent and ever more restrictive immigration polices for high skilled foreign nationals, we do not see these trends abating in the foreseeable future,” added Roberts.

The following table presents information about the total number of jobs in certain sectors that provide a significant amount of employment for IT and engineering professionals.

Technical note: TechServe Alliance’s IT Employment Index and Engineering Employment Index are the first specific measurement of IT and engineering employment. These unique measurements of total IT and engineering employment are created monthly by studying the ongoing staffing patterns of a dozen IT and computer related occupations in 22 industries and industry sectors employing significant numbers of IT workers and nearly two dozen engineering occupations in 30 select industries and industry sectors employing significant numbers of engineering workers. Both the monthly IT Employment and Engineering Employment Indices are based on U.S. Bureau of Labor Statistics (BLS) data, which is subject to monthly revisions, and is revised accordingly. Both indices are also subject to periodic revisions and annual re-benchmarking that includes revisions to several years of employment data, which also may incorporate new occupational definitions. Both indices were re-benchmarked going back several years. Minor are made each month for the preceding two months starting with January 2019 data and published in February 2019. In addition, both indices are subject to minor revisions to March and April data. The next major revision will be published in February 2020.

ABOUT TechServe Alliance

TechServe Alliance is the national trade association of the IT & Engineering staffing and solutions industry. Hundreds of IT & Engineering staffing and solutions firms and tens of thousands of affiliated professionals, count on TechServe Alliance to keep their leadership informed, engaged and connected. TechServe Alliance serves as the voice of the industry before the policymakers and the national and trade press. By providing access to the knowledge and best practices of an entire industry and tapping the "collective scale" of hundreds of companies, TechServe Alliance supports its members in the efficient delivery of best-in-class IT & Engineering staffing and solutions for clients and exceptional professional opportunities for every consultant.
